SCR501

- temperature range -50 ÷ 200°C
- possibility of mounting a 4..20 mA or 0...10 V temperature transmitter
- stainless steel sheath with or without perforation, small diameter
- connection via terminal connector strip
- IP 65 protection degree

Resistance thermometers SCR500 are designed for ambient temperature measurement inside and outside residential, office and industrial spaces. There is a possibility of assembling a programmable temperature transmitter with a 4...20 mA output signal into the housing. The protection tube with perforation allows for quick and precise temperature measurement, thanks to direct contact of thermometric resistor with ambient temperature.
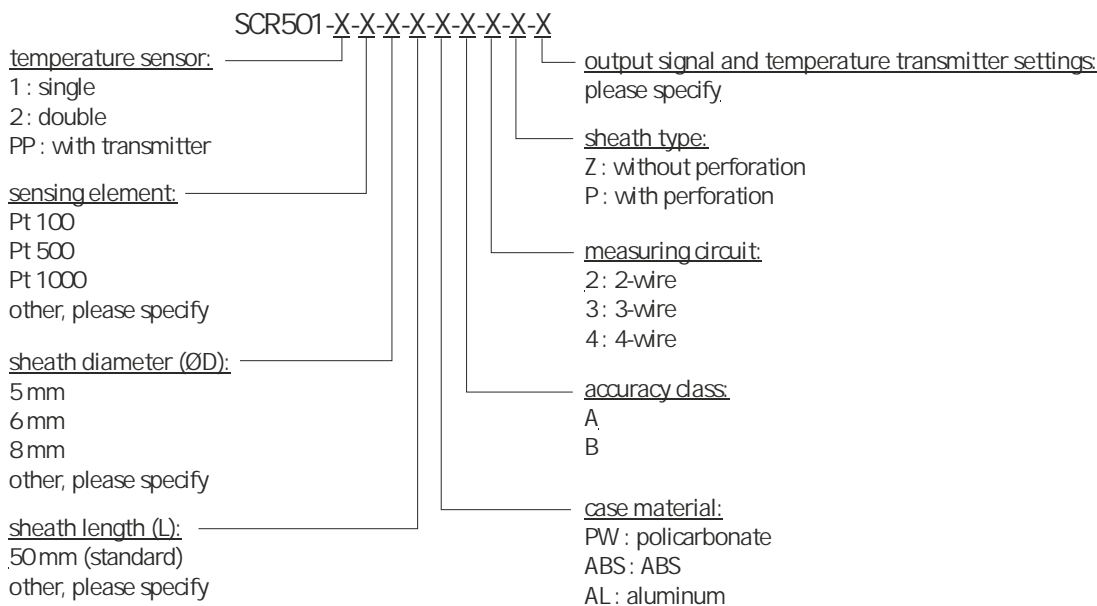

Application areas:
- ambient temperature measurement in rooms and outside,
- warehouses and cold stores,
- offices,
- air-conditioning and ventilation installations.
