

CCA-P-331P

- industrial pressure transmitter
- nominal pressure: from 0...100 mbar up to 0...40 bar
- output signals: 2-wire: 4...20 mA; 3-wire: 0...10V
- process connections with flush welded stainless steel diaphragm
- accuracy 0.35 % span
- hygienic version
- CIP / SIP cleaning up to 150°C
- vacuum resistant

The pressure transmitter **CCA-P-331P** was designed for use in the food / beverage and pharmaceutical industry. The compact design with hygienic versions makes it possible to achieve an outstanding performance in terms of accuracy, temperature behavior and long term stability. The modular construction concept allows a combination of various process connections with different filling fluids and a cooling element. Several electrical connections complete the profile of CCA-P-331P.

!!!! When you make an order it is necessary to fill the questionnaire for transmitter with separators!!!

1 - absolute pressure possible from 0.4 bar

2 - code TR0 = PVC cable, cable with ventilation tube available in different types and lengths; cable not included in the price

3 - the cup nut has to be mounted by production of pressure transmitter with electrical connection field housing and mechanical connection dairy pipe.
the cup nut has to be ordered as separate position.

4 - possible only for $P_N > 1$ bar

5 - possible only for $P_N > 2$ bar

Manufacturer reserves the right to change sensor specifications without further notice.
