- output signals: 2-wire: 4...20 mA; 3-wire: 0...10 V (for CCA/CPA-P-331i)
- stainless steel sensor
- accuracy 0.1 % span
- thermal error in compensated range -20...80°C: 0.2 % span
- turn down 10:1
- communication interface for adjusting of offset, span and damping
- certified for contact with drinking water by the Polish National Institute of Public Health (PZH) - EPDM version

The precision pressure transmitter **CCA-P-331i** and **CCA-P-333i** as well as the precision screw-in level probe **CPA-P-331i** demonstrate the further development of our industrial pressure transmitters. The signal of the sensor is processed by the intelligent digital electronics with 16-bit A/D converter which is able to do an active temperature compensation and linearization. Due to this we are able to offer the transmitters with excellent measurement parameters and exceptionally attractive price.
